

PROF. ARNALDO FILIPPINI**General Surgery**
Oncological Surgery

- Surgical treatment of locally advanced tumors and multi-organ resections
- Experience in advanced laparoscopic techniques and reconstructive microsurgery applied to the treatment of tumors and massive substance losses
- More than 15,000 surgical interventions performed

EDUCATION

1980 Degree in Medicine and Surgery at the University of Chieti with a grade of 110/110 cum laude.
1985 Specialization Diploma in "General Surgery" at the University of Pisa with the maximum score.
1990 Specialization Diploma in "Plastic Surgery" at the University of Padua with the maximum score.

SCIENTIFIC TEACHING ACTIVITY

From 1982 to 1996 Head of the Experimental Surgery Center at the University of Chieti with research on micro-vascular transplantation of autologous tissues.

Since 1984 Researcher at the Department of Surgery of the University of Chieti.

Since 1985 Professor of Microsurgery at the University of Chieti.

Currently teaching Plastic Reconstructive Surgery at the University of Chieti.

Currently teaching in the Specialization Schools: General Surgery, Vascular Surgery, Pediatric Surgery, Gynecological Surgery.

He was Director of a research contract of the C.N.R. concerning "Role of the hepatotrophic factor and hepatic flow in the regeneration of the liver after portal shunts and hepatic arterialization".

CLINICAL ACTIVITY

Main field of interest: oncological surgery and in particular "Surgical treatment of locally advanced tumors and multi-organ resections".

He attended the major reference centers in the oncology field in the world, including:

- Memorial Sloan Kettering, New York
- Cornell University, New York
- Mount Sinai Hospital, New York
- City of Hope, Los Angeles

He personally performed 15,000 surgical operations. Over the past 20 years he has gained particular experience in advanced laparoscopic techniques and reconstructive microsurgery applied to the treatment of tumors and massive substance losses.

Author of over 100 scientific publications, and co-author of 2 monographs.

He has been a speaker at numerous national and international conferences.
