UROLOGY

UROLOGICAL SURGERY

[YT Interview](#)

Dr. Carlo Saltutti is a Medical Doctor specialized in Urology, currently practicing at the facilities of the GVM group (Gruppo Villa Maria), one of Italy's leading healthcare networks, known for its excellence in medical management and high-quality services.

After graduating in Medicine and Surgery, Dr. Saltutti specialized in Urology, gaining advanced expertise in treating disorders of the male and female urinary system, as well as the male reproductive system. Throughout his professional journey, he has focused on innovative and minimally invasive surgical techniques, such as robotic and laparoscopic surgery, especially for the treatment of prostate, kidney, and bladder cancers.

Over the years, Dr. Saltutti has attended numerous national and international conferences, expanding his knowledge and contributing to the advancement of therapeutic and surgical techniques in the urological field. He is known for his clinical expertise and dedication to his patients, adopting a personalized approach to each case to ensure effective, high-quality care.

His work at GVM facilities, which boast cutting-edge technologies and a highly qualified medical team, allows Dr. Saltutti to offer comprehensive services ranging from early diagnosis to treatment and post-operative rehabilitation. His areas of specialization include, in addition to urological cancers, the treatment of prostate conditions, kidney stones, urinary incontinence, and male sexual dysfunction.

Thanks to his experience and passion for the medical profession, Dr. Carlo Saltutti is a reference point for patients seeking excellent urological care at the GVM group.
